MADE IN GERMANY

SEBO 370 / 470 COMFORT

GOOD FOR BUSINESS

The 370 and 470 Comfort are the latest evolution of SEBO's premium professional upright vacuum cleaners. Dependable and rugged, they are built to last using the best materials and components and are designed to clean large areas quickly and without fatigue. The Comfort power head gives outstanding performance, as well as making the machine easy to push and easy to service.

01 Works when flat

These machines work when completely flat, making it easy to clean under furniture.

02 Brush off when upright

When the machine is put into the upright position, the brush motor will automatically turn off and will re-start when the foot pedal is depressed and the handle lowered.

03 Innovative electronics

An electronic controller featuring the latest SMD technology uses easy to see LED lights to advise the optimum brush height and will turn off the brush motor if the brush becomes jammed.

04 Easy brush strip change

The brush strip can be changed without the use of tools, simply by pressing a button, releasing the side plate and then sliding out the brush strip.

05 Built-in tools

Neatly and conveniently stored in the back of the machine are a full size crevice nozzle and an upholstery nozzle.

06 Practical design

With four wheels, the Comfort power head is easy to push for fatigue-free use. It has a built-in trap door for rapid blockage removal and an easy to replace base plate.
